DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 22-37, 43-46, drawn to a method for re-synchronization in communication system according with the determined parameter, classified in class 455, subclass 436.
- II. Claims 17-21, 38-42, 47, drawn to a method for re-synchronization in communication system according to the period is less than life of the broadcast session, classified in class 455, subclass 439.

Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as handoff is initiated by another source. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
